History

from WorldNet 2.0:

critrion

- n 1: a basis for comparison; a reference point against which other things can be evaluated; "they set the measure for all subsequent work" [syn: standard, measure, touchstone]
- 2: the ideal in terms of which something can be judged; "they live by the standards of their community" [syn: standard] [also: criteria (pl)]

An editorial found in the Bend Bulletin, Nov 10, 1959 states that when the post office was established on Sept 11, 1913, three names were proposed; Canfield, Three Notch Juniper and Criterion. The last was suggested by J. Elmer Lindsay who stated that he found the word by chance in a dictionary.

Criterion Summit is the highest point on The Dalles - California Highway between The Dalles and Redmond.
